Hydraulic Cylinders

Valve series Hydraulic Cylinder

Hydraulic cylinder bottom integrated integrated quick-shut off function, when the piston rod retreat, can get two different speeds and two speeds of the stroke can be adjusted within a certain range;

Typical applications: thermal power, hydropower, nuclear power and other large valves.

Truck crane series hydraulic cylinder

Tonnage: 5T...20T

Type: straight arm and folded arm

In view of the high pressure, eccentric partial load and other environments of truck-mounted hydraulic cylinders, special support and sealing combinations, high-strength alloy materials, and reasonable heat treatment processes are used to fully guarantee the performance and reliability of the truck-mounted hydraulic cylinders.

Metallurgical Engineering Series Hydraulic Cylinder

Rated pressure: 32MPa;

In line with international ISO standards, German DIN standards; Metallurgical heavy-duty series of hydraulic cylinders;

Both ends can be buffered, which can be interchanged with Rexroth CDH2/CDM1/CDT3 and Parker MMA/MMB/HMI series mounting dimensions;

Typical applications: steel and metallurgical industries.
